## **JULY 2009 NEWSLETTER**

It has now been some 9 months since we took over the centre and sent out our initial mail shot. We feel that we would like to keep all engineers up to date with courses we offer at our Great Yarmouth Centre.

### **OFTEC**

A four day course covering the following three modules:

- OFT105E–Domestic Oil Firing System/Installation and Energy Conservation Measures in Buildings.
- OFT101 – Domestic/light Commercial Pressure Jet Appliance commissioning and Servicing.
- OFT600A- Domestic/Non-domestic Oil Storage and supply Installation

### **ESSENTIAL ELECTRICS**

This course will provide the minimum level of competence required to work on gas appliances and electrical controls in accordance with the Electricity at Work Regulations. These regulations require anyone undertaking any electrical work on an appliance (e.g. removal of a fan for servicing) to be competent to do so.

### **ENERGY EFFICIENCY**

A one day course aimed at operatives who need to self-certify their own boiler installations under Building Regulations Part L1. Obtaining this certificate will streamline your notification to Building Control. Gas Safe Register will be checking when Boilers are notified that the Engineer has an Energy Efficiency Certificate.

### **CPA1 – Combustion Performance Analysis Training & Assessment**

A one day course with assessment covering the use of flue gas analysers. A competency required for engineers working on new installations and existing boilers, where manufacturers instructions state an analyser is to be used as part of the service/ commissioning procedure. Did you know that not all appliances require a full strip and clean at service time? This assessment will provide the competency to assess the level of service that an appliance requires.

### **UNVENTED HOT WATER COURSE (Initial & re-assessment)**

#### **WATER REGULATIONS COURSE.**

We offer both of the above, each course is 1 day duration.

Unvented certificate is a requirement for installations of all Unvented Cylinders and Combi Boilers over 15 Litre Capacity as per Building Regulations Part G3.

### **\*\*\*\*\* NEW FOR SEPTEMBER – EVENING COURSES \*\*\*\*\***

**For the busy engineer who does not want to lose time in the day**

We can now offer CCN1 re-assessment training from 6-9pm over two weeks total 4 evenings\* with 2 days Assessment.

We can also offer the CPA1 Training and Assessment over two evenings\*.

\*Subject to minimum numbers, terms and conditions apply

(continued over the page)

**GRANT APPLICATION FORMS ARE AVAILABLE** – Giving up to 50% off the cost of many of our courses. This is a Government scheme run by Beyond 2010.

If you would like to be kept up to date with regular bulletins and receive our Newsletters electronically, please email:

**domesticgasuk@aol.com**

We regularly look at the different courses that we offer, if there is something that you think we might be able to add please contact us with details.

**We offer regular training and assessment dates for all Natural Gas & LPG courses, please do not hesitate to contact us to arrange course dates.**
